

```
In [ ]: # Data Science Tools and Ecosystem
```

```
In [ ]: In this notebook, Data Science Tools and Ecosystem are summarized.
```

```
In [ ]: Some of the popular languages that Data Scientists use are:
```

1. Python
2. R
3. SQL

```
In [ ]: Some of the commonly used libraries used by Data Scientists include:
```

1. Pandas
2. NumPy
3. Matplotlib

```
In [ ]: | Data Science Tools |  
|-----|  
| Jupyter Notebook   |  
| RStudio            |  
| Apache Hadoop      |
```

```
In [ ]: ### Below are a few examples of evaluating arithmetic expressions in Python
```

```
In [ ]: # This code multiplies 3 by 4 and then adds 5  
result = (3 * 4) + 5  
print(result)
```

```
In [ ]: # Convert 200 minutes to hours  
minutes = 200  
hours = minutes / 60  
print(hours)
```

```
In [ ]: **Objectives:**
```

- List popular languages for Data Science
- Identify commonly used libraries in Data Science
- Create tables using markdown to organize tools
- Perform basic arithmetic operations in Python
- Convert units using simple Python expressions

```
In [ ]:
```
